

Advance your priorities with the Intelligent Cloud

Government leaders are looking for breakthrough ways to advance the mission, analyze massive amounts of data, and modernize legacy systems while creating a foundation for the future.

Utilizing the cloud gives IT organizations the opportunity to do more with limited budgets, freeing up resources for new initiatives that can move your mission forward.

Provide secure and modern ways for citizens to engage government on their own terms, on any device, at a time that works for them.

Harness the power of connected devices, analytics, and deep learning to enable actionable insights, make better decisions more rapidly, and collaborate more easily.

Deliver change using the government-only cloud you can trust, with state-of-the-art security and an environment built to exceed the highest compliance requirements.

“ When we assessed our environment and found obsolete and failing technology that would cost millions of dollars to replace, we decided to go all in on the cloud.”

Maria Roat

CIO, SMALL BUSINESS ADMINISTRATION (SBA)

WHY AZURE GOVERNMENT

Unlock **innovation** with powerful data and analysis services to rapidly build **intelligent** solutions at scale.

Enable **productivity** with a growing marketplace and managed services to help you focus on your mission.

Meet critical **compliance** standards and exceed U.S. Government regulatory requirements.

Rest assured with the **trusted** cloud exclusive to government, with world-class **security** and advanced threat protection services.

Accelerate development with an open platform and unified tools and services in a **flexible** and truly **hybrid** environment.
